Dr. Hernando Tavera
Executive President
Instituto Geofísico del Perú
Calle Badajoz 169
Urb. Mayorazgo IV Etapa, Ate
Lima 15012, Peru

Dear Dr. Tavera,

It is my pleasure to invite Dr. Danny Scipion, director of the Jicamarca Radio Observatory to attend the 2026 CEDAR Workshop to be held at the Des Moines Convention Center in Des Moines, IA from June 21st– 26th, 2026.

The workshop includes community organized breakout workshops as well as grand challenge workshops, poster session with a student poster competition, a student day, plenary sessions with science highlights, agency updates and tutorials, a distinguished lecture, and a prize lecture.

Dr. Scipion is the international representative of the CEDAR Science Steering Committee, and he is also organizing the workshop “Frontiers in Equatorial Aeronomy” where he will present the latest updates of the Jicamarca Radio Observatory.

We look forward to Dr. Scipion attending the workshop this year. This is an excellent opportunity to meet and talk with other colleagues in his research community.

We look forward to seeing him there!
Sincerely,

Maggie Payeur
