

Axial low-pressure fans in steel black polymer-coated casing.

Designed for supply-exhaust ventilation systems and for cooling compression-condensation units.

Works in supply or exhaust mode depending on how it is mounted into the ventilation system.

Induction ball-bearing motors are protected from overheating.

STORM can be equipped with a bipolar or quadropole induction motor. Configuration depends on the fan size. 200, 250, 300 mm diameter models are equipped with a bipolar motor. 350, 400, 450 mm diameter models are equipped with a quadropole motor.

Mounted to wall and ceiling surfaces with special square mounting panel (flange).

Equipped with a flange for easy mounting into air ducts of the corresponding size.

IPX4 Ingress protection rating for electrical equipment.
